LIST OF CONTENTS

NUMBER 1

	i	Announcement
D. Bushnell	1	Improved optimum design of dewar supports
C.-K. Choi and **S.-H. Kim**	57	Reduced integration, nonconforming modes and their coupling in thin plate elements
G. Donida, R. Bruschi and **R. Bernetti**	63	Infinite elements in problems of geomechanics
F. G. Benitez and **A. J. Rosakis**	69	A point load in the interior of a thick plate
M. M. ElMadany	89	Active damping and load leveling for ride improvement
J. L. Chen and **P. Hajela**	99	FEMOD: a consultative expert system for finite element modeling
O. L. Roufaeil	111	Vibration analysis of plates on intermediate supports using finite strip method
K. A. Meroueh	117	On a nonlinear theory of plates and shells including consistent and inconsistent kinematics and the finite element method
D. P. Thambiratnam and **V. Thevendran**	133	Optimum design of conical shells for free vibration
E. S. Sikiotis and **V. E. Saouma**	141	Parallel structural optimization on a network of computer workstations
H. L. Soriano and **F. V. Filho**	151	On Rutishauser's modified method for computing the eigenvalues of real tridiagonal symmetric matrices
B. Hučko and **J. Murín**	155	Incremental equations for the large displacements analysis in the finite element method
V. Ramamurti and **P. Seshu**	161	Dynamic analysis of a pressure vessel
		Technical Note
B. W. R. Forde and **S. F. Stiemer**	171	ESA: expert structural analysis for engineers
		Announcement
	175	Symposium on Advances and Trends in Computational Structural Mechanics and Fluid Dynamics, 17–19 October 1988, Sheraton National Hotel, Washington, DC, U.S.A.
	I	Software survey section

NUMBER 2

	i	Announcement
D. B. McCallen and K. M. Romstad	177	A continuum model for the nonlinear analysis of beam-like lattice structures
D. J. Stevens and T. Krauthammer	199	A finite difference/finite element approach to dynamic soil–structure interaction modelling
A. K. Chugh	207	Flow nets for zoned anisotropic media by the boundary element method
C. Manu	221	On the implementation of connected degrees of freedom in a frontal solver
Ž. Lozina	227	A comparison of harmonic acceleration method with the other commonly used methods for calculation of dynamic transient response
J. L. M. Clemente and J. M. Polo	241	Micro-computer analysis of pile group settlement using independent point and shaft loads
B. Stafford-Smith, A. Coull and M. Cruvellier	257	Planar models for analysis of intersecting bent structures
C. A. Rogers and C. E. Knight, Jr	265	An axisymmetric linear/high-order finite element for filament-wound composites—I. Formulation and algorithm
C. A. Rogers and C. E. Knight, Jr	273	An axisymmetric linear/high-order finite element for filament-wound composites—II. Evaluation on filament-wound cylinders
I. E. Harik and G. L. Salamoun	283	The analytical strip method of solution for stiffened rectangular plates
R. Riff and G. J. Simitses	293	Thermo-elasto-viscoplastic analysis of problems in extension and shear
G. M. Vörös	301	A special purpose element for shell–beam systems
C. T. Sun and K. M. Mao	309	A global–local finite element method suitable for parallel computations
G. Singh and Y. V. K. Sadasiva Rao	317	Stability of thick angle-ply composite plates
H. Y. Chang, S. Utku and M. Salama	323	Eigenvalue computation of large symmetric tri-diagonal matrices on concurrent processors
J. T. Wang and R. L. Huston	331	Computational methods in constrained multibody dynamics: matrix formalisms

C. Militello and A. E. Huespe	339	A displacement-based pipe elbow element
A. D. Belegundu	345	The adjoint method for determining influence lines
		Technical Notes
N. Venugopal, G. Venkateswara Rao and B. P. Shastry	351	Lateral stability of cantilever beams subjected to concentrated or uniformly distributed loads
I-M. Yang	353	An iterative method for solving nonlinear eigenvalue problems in matrix form
	I	Software survey section
		NUMBER 3
	i	Announcement
H. S. Mitri and F. P. Hassani	355	Nonlinear finite element analysis of mine roadway arch support systems
U. Icardi and A. Manuello	365	Free edge stress propagation in composite laminates
A. Kassimali and E. Bidhendi	381	Stability of trusses under dynamic loads
A. C. Singhal	393	A numerical simulation for the expansive diaphragm within creeping salt deposits
A. Kaveh	403	Topological properties of skeletal structures
W. C. Zhang and K. E. Evans	413	Numerical prediction of the mechanical properties of anisotropic composite materials
W.-H. Chen and J.-T. Yeh	423	Finite element analysis of finite deformation contact problems with friction
L. Martini and R. Vitaliani	437	On the polynomial convergent formulation of a C^0 isoparametric skew beam element
C. W. S. To	451	Recursive expressions for random response of non-linear systems
J. D. Lee and B.-L. Wang	459	Optimal control of a flexible robot arm
J. D. Lee and B.-L. Wang	469	Dynamic equations for a two-link flexible robot arm
S. M. Jun and C. S. Hong	479	Buckling behavior of laminated composite cylindrical panels under axial compression
I. Kreja and Z. Cywiński	491	Is reduced integration just a numerical trick
A. Y. T. Leung and S. C. Wong	497	Local–global distribution factors method for tall building frames

G. Pijaudier-Cabot and **Z. P. Bažant**	503	Dynamic stability analysis with nonlocal damage
M. Klein and **I. Levit**	509	Consistent derivation of structural finite elements using displacement constraints
Y. Frostig and **G. J. Simitses**	519	Buckling of ring-stiffened multi-annular plates
		Technical Note
R. Royles and **J. M. Llambias**	527	Point loading effects on the echinodome
	I	Software survey section
		NUMBER 4
	i	Announcement
W. J. Sim and **B. M. Kwak**	531	Linear viscoelastic analysis in time domain by boundary element method
R. Ghadimi	541	A simple and efficient algorithm for the static and dynamic analysis of flexible marine risers
J. P. Desai, A. K. Jain and **A. S. Arya**	557	Seismic response of R.C. braced frames
S. M. Vijayakar, H. R. Busby and **D. R. Houser**	569	Linearization of multibody frictional contact problems
I. Antoniadis and **A. Kanarachos**	577	Modal decoupling methods for fluid–structure interaction in piping systems
T. Belytschko and **B. E. Engelmann**	587	Explicit time integration with enhanced stability for structural dynamics
R. C. Kar and **T. Sujata**	591	Parametric instability of a non-uniform beam with thermal gradient resting on a Pasternak foundation
W. C. McCarthy and **A. Q. Melhem**	601	Elasto-plastic analysis of composite steel–concrete superstructures
V. Murti, Y. Wang and **S. Valliappan**	611	Numerical inverse isoparametric mapping in 3D FEM
D. Karamanlidis	623	A simple and efficient curved beam element for the linear and non-linear analysis of laminated composite structures
A. F. Sayegh and **F. K. Tso**	633	Analysis of linear structures on nonlinear pile foundations

J. Ezechiáš	645	Contribution to the calculation of thick arcs with respect to shearing strain and extension of the centroid axis
H. Krishnamurthy, M. Pourazady and R. L. Huston	657	Critical frequencies of a dynamically loaded viscoelastic rod
A. Służalec	661	Thermal effects within the eye in the process of cryotherapy
O. G. Vinogradov	667	Dynamics of frictionally constrained finite rod
G. Dilintas, P. Laurent-Gengoux and D. Trystram	675	A conjugate projected gradient method with preconditioning for unilateral contact problems
N. D. Ebrahimi	681	Optimum design of flywheels
M. S. Cheung, W. Li and L. G. Jaeger	687	Nonlinear analysis of cable-stayed bridge by finite strip method
Y. Z. Chen and J. R. Xie	693	Evaluation of natural frequencies of non-uniform beams by numerical integration
V. Thevendran and D. P. Thambiratnam	699	Minimum weight design of conical concrete water tanks
N. E. Shanmugam	705	Effective widths of orthotropic plates loaded uniaxially
M. A. Bradford and S. W. Waters	715	Distortional instability of fabricated monosymmetric I-beams
		Technical Note
K. Kanaka Raju and G. Venkateswara Rao	725	Post-buckling analysis of moderately thick cylindrically orthotropic circular plates
		Announcement
	729	3rd International Conference on Structural Failure, Product Liability and Technical Insurance, Technical University Vienna, Vienna, Austria, 10–12 July 1989
	I	Software survey section

NUMBER 5

	i	Announcement
S. H. Lo	731	Finite element mesh generation over curved surfaces
K. K. Tamma and A. A. Yurko	743	A unified finite element modeling/analysis approach for thermal–structural response in layered composites

K.-O. Kim and **D. V. Wallerstein**	755	Modal design sensitivities for multiple eigenvalues
P. J. Magari, L. A. Shultz and **V. R. Murthy**	763	Dynamics of helicopter rotor blades
H. L. Soriano and **F. Venâncio Filho**	777	On the modal acceleration method in structural dynamics. Mode truncation and static correction
C. C. Chang, R. S. Sandhu, R. L. Sierakowski and **W. E. Wolfe**	783	Continuous stress finite element analysis of a free-edge delamination specimen
A. A. Slonim	795	Computer approximation for the analysis of transient processes in nonoscillating engineering systems
S. G. Ekhande and **M. K. S. Madugula**	801	Geometric non-linear analysis of three-dimensional guyed towers
M. S. Hamid, H. N. Sabbah and **P. D. Stein**	807	Dynamic response of closed bioprosthetic valve leaflets
G. Tsamasphyros and **M. Papaioannou**	815	Mapping techniques for the automatic mesh generation around singularities
S. K. Malhotra, N. Ganesan and **M. A. Veluswami**	825	Effect of fibre orientation and boundary conditions on the vibration behaviour of orthotropic square plates
V. Ramamurti and **M. A. Rao**	831	Dynamic analysis of spur gear teeth
R. Larsson and **N.-E. Wiberg**	845	Stability of elastic plane frames including soil–structure interaction
G. Prathap, B. P. Naganarayana and **B. R. Somashekar**	857	Field-consistency analysis of the isoparametric eight-noded plate bending element
M. Iura and **S. N. Atluri**	875	Dynamic analysis of finitely stretched and rotated three-dimensional space-curved beams
T. A. Cruse, O. H. Burnside, Y.-T. Wu, E. Z. Polch and **J. B. Dias**	891	Probabilistic structural analysis methods for select space propulsion system structural components (PSAM)
D. V. Murthy and **R. T. Haftka**	903	Approximations to eigenvalues of modified general matrices
		Technical Notes
S. S. Ahmed and **S. S. Dey**	919	The circle–polygon paradox in the light of the boundary-element method
J. Pietrzak	923	Principal axes of wind-loaded trusses

G. Venkateswara Rao, K. Kanaka Raju and **N. V. R. C. Balabhaskar**	927	Post-buckling behaviour of isotropic annular plates under uniform internal radial load
	I	Software survey section
		TAG, CADOCS
		NUMBER 6
	i	Announcement
M. R. Khalil, M. D. Olson and **D. L. Anderson**	929	Nonlinear dynamic analysis of stiffened plates
C.-C. Lin and **T.-S. Yang**	943	Application of multiplier update method to the minimum weight design of elastic plates
D. Briassoulis	949	Monomial test: testing the flexural behavior of the degenerated shell element
B. S. Sarma, T. K. Varadan and **G. Prathap**	959	On various formulations of large amplitude free vibrations of beams
S. Dasgupta and **D. Sengupta**	967	Horizontally curved isoprametric beam element with or without elastic foundation including effect of shear deformation
J. Blachut	975	Optimally shaped torispheres with respect to buckling and their sensitivity to axisymmetric imperfections
F. M. L. Amirouche and **T. Jia**	983	Modelling of clearances and joint flexibility effects in multibody systems dynamics
P. Léger	993	Load dependent subspace reduction methods for structural dynamic computations
Y. M. Desai, N. Popplewell, A. H. Shah and **D. N. Buragohain**	1001	Geometric nonlinear static analysis of cable supported structures
S. Roy and **J. N. Reddy**	1011	A finite element analysis of adhesively bonded composite joints with moisture diffusion and delayed failure
Y. Liu and **K. Chen**	1033	A two-dimensional mesh generator for variable order triangular and rectangular elements
A. Safjan	1055	Nonlinear structural analysis via reduced basis technique
L.-W. Chen and **C. C. Chen**	1063	Asymmetric buckling of bimodulus thick annular plates

Y. A. Khulief and **L. Yi**	1075	Lead–lag vibrational frequencies of a rotating beam with end mass
A. Y. T. Leung	1087	Integration of beam functions
J. E. Ammeson, M. R. Pyles and **H. I. Laursen**	1095	Three-dimensional analysis of guyed logging spars
A. N. Palazotto and **T. W. Tisler**	1101	Considerations of cutouts in composite cylindrical panels
S. Swaddiwudhipong, Y. B. Lim and **S. L. Lee**	1111	An efficient finite strip analysis of frame–shear wall tall building
A. Alaylioglu	1119	Procreated C^1 displacement generic plate vibration model
	I	Software survey section
